Seamless integration with the most popular accounting software

Define, create and test alerts.

Alerts received on any email enabled device

The Mobile Alerts module allows MISys to send critical alerts to smart phones or any mobile device capable of receiving wireless email messages. The MISys Dashboard has been enhanced so that you can schedule alerts to run unattended 24/7 and, should such an alert be triggered, send a message with critical data to your iPod Touch, smart phone, or any other mobile device.

FEATURES & BENEFITS

- Unlimited number of customizable alerts.
- No need to log into the system to receive alerts.
- Select to receive alert updates every 10 mins, hour, daily or only when a change occurs.
- Automatically send alerts to yourself, purchasing, suppliers, vendors, managers, etc.
- Create alerts to be triggered by data added to custom fields.
- Customize the alert message with your own text.

MOST POPULAR ALERTS

- Inventory shortages
- Overdue POs
- PO approvals
- Missing inventory for upcoming production
- Automatic vendor/customer follow-up
- and many more.
